## Do You Qualify?

### You may be eligible for Medicare.

We can help you determine if you qualify and, if so, work with you to select the best Medicare coverage to meet your health care needs and financial situation.

Because Medicare isn't a welfare program, your income and assets don't affect your eligibility. Two groups of people qualify for Medicare:

#### 1) Social Security Disability Insurance Recipients

- You are under age 65 and receiving Social Security disability benefits for at least 24 months.
- You may qualify for Medicare earlier than other SSDI beneficiaries if you suffer from End-stage renal disease or ALS.

#### 2) Individuals age 65 and older

- You are a citizen or permanent resident of the United States, and
- You have worked for at least 10 years for a Medicare covered employer or have a spouse who has.

### Not sure? Call us.

We'd be happy to walk you through eligibility. Call us at 800-825-7734. Or, complete the contact form [here](#), and we will call you at your convenience.
